### **Application range and purpose**

Each enterpriser (operator) takes the responsibility for the health and security of its employees. This run from the staff, repair within its own work shop to repair at contractor work shop

The attached decontamination-statement is to be understood as information of the contractor about the possible contamination of the send in fan unit - / item- component. On the basis of this information the contractor is able to take the necessary safety measures while/during repair-work.

From now on we can only accept return delivery of used fans unit- / item- component with the filled in decontamination-statement.

**Note:** For repair work in your work shop, performed by Piller staff same regulations are applicable.

Attached you may find the decontamination-statement as PDF-file for download.

### **Preparation of dispatch**

Prior to dispatch of the unit, the operator has to fill in the following statement completely and hand in together with the shipping documents. The given shipping instructions within the corresponding users manual needs to be taken in account. For example:

- discharge manufacturing resources
- air-tight sealing of all vents
- appropriate packing
- dispatch in proper transport container
- decontamination-statement to be attached on the OUTSIDE (!!) of the packing

yours faithfully,
