

PILLER A-SERIES ATOMIZING AIR COMPRESSOR

PROTECT YOUR GE FRAME GAS TURBINE FROM EXPENSIVE DOWNTIME

Are you the operator of an GE Frame Gas Turbine? Then you probably know that it's quite annoying when the turbine is suddenly inoperable because of a broken expendable part. The atomizing air compressor is one of the components that can cause long, expensive and unexpected downtime. The good news: With the assistance of German Compression-Specialist Piller Blower & Compressors, you now have an alternative source for atomizing compressor parts and new compressors for your GE Frame Gas Turbine.

PILLER A-SERIES: A NEW COMPRESSOR FOR GE FRAME GAS TURBINES

We support you in your efforts to shorten the downtime. How? With the help of a new high quality and affordable compressor called the A-Series, which is designed specifically for use in GE Frame Gas Turbines. The A-Series, an alternative to the original equipment compressors (Atlas Copco SCF-6), has the highest quality parts, such as impellers that are five-axis-milled from aircraft quality material and gearing which meets AGMA Q-13 quality standards.

ATOMIZING AIR COMPRESSOR SUPPORT SERVICES

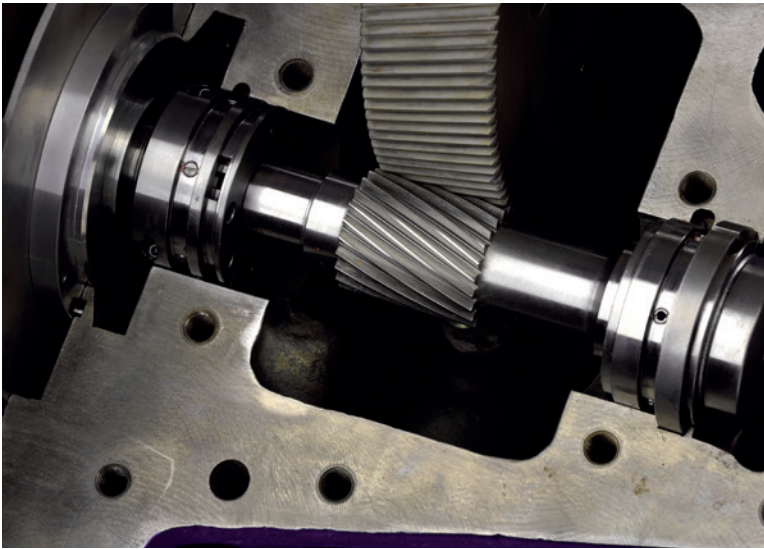

We are equipped for your emergency and have all of the most common A-Series compressors in stock. We can guarantee a short delivery time of less than a week for most atomizing air compressors models. It's also possible to reduce the downtime even more with the assistance of the PILLER service team. Our experts support your technicians with the installation of the A-Series compressor. We will reply to all technical questions on the phone by request or travel to your installation, so that your GE Frame Gas Turbine will be operational again in no time.

The PILLER A-Series compressor: It's high quality, durable and affordable. PILLER can meet the shortest delivery time.

Replacement parts, which also fit the Atlas Copco SCF-6.

The A-series compressor: Engineered and produced to the highest standards.

High speed and low speed bearings.

PILLER ALSO REPAIRS BROKEN COMPRESSORS

You would like to have a compressor that has failed repaired? No problem at all. We also offer repair services. Just send the failed air compressor to our New York facility. Our experts will repair it and send it back to you as quickly as possible to minimize your downtime.
