PILLER, the leader in Mechanical Vapor Recompression (MVR) Blowers, has an improved solution for low flow MVR applications. For over 30 years PILLER has offered low flow high speed MVR Blowers and now – through our continuous improvement program – we are offering our VapoFan series. This series of MVR Blowers offers advanced performance with improved reliability in a standard equipment offering. The VapoFan series is a complete system consisting of vertically arranged blower with support structure, a high speed motor and a Variable Frequency Drive (VFD) with machinery monitoring instruments mounted in a standalone control cabinet. The VapoFan is a modular solution for lower cost and short delivery times of only 10 weeks. Blower and motor are perfectly matched for mass flows from 200 to 5,000 kg/h.

**KEY-FEATURES OF THE VAPOFAN**

**Dimensions and weights**
- Weights: approx. 400 kg – 600 kg
- Height: approx. 1.60 m – 2.20 m
- Width: approx. 1.50 m x 1.00 m

**PILLER High Speed Blower**
- Performance: up to 10 K temperature rise single stage
- Casing material: Duplex
- Impeller materials:
  - Welded: Super Duplex
  - Milled: 17-4PH for high mass flow units
- Shaft seal (4 rings): water/vapor buffer or vacuum suction

**The Drive Train**
The drive train is a perfectly matched system of the synchronous high speed motor and the VFD cabinet.

- **PILLER High Speed Motor**
  - 90 kW, motor speed up to 11,000 rpm
  - 55/37/22 kW, motor speed up to 13,500 rpm
  - Hybrid ceramic bearing L10h = 40,000 h
  - Automatic regreasing

- **VFD Cabinet**
  - HF filter, commutator, sine filter
  - Power supply: 400 V/50 Hz, 480 V/60 Hz
  - Control voltage: 24 VDC
  - Temperature, speed and vibration monitoring
  - Cabinet: (LxWxH) 1.0 x 0.66 x 2.11 m
  - Weight: approx. 500 kg
VapoFan 2-stage design

Additionally, we offer engineered standard 2-stage design – for temperature rise up to 21 K.

Dimensions and weights
- Weights: approx. 800 kg – 1,200 kg
- Height: approx. 2.50 m
- Width: approx. 1.50 m
